EDUCATION

SIJIL PELAJARAN MALAYSIA 2019-2023

SMK AMINUDDIN BAKI

5A

DILPOMA IN INFORMATION TECHNOLOGIES 2024-CURRENT

ASIA PACIFIC UNIVERSITY

CGPA: 3.7

SIDE PROJECT

Gamified Learning Platform (Final Year Project) 2024-CURRENT
Technologies: PHP, MySQL, JavaScript, HTML/CSS
GitHub: https://github.com/alousius116/gamified-learning-platform

- Developed a gamified learning platform designed to improve student engagement through interactive learning systems and game mechanics
- Implemented login and registration system with user authentication
- Created battle system, task management system, profile management, and reward shop features
- Connected backend database for user progress tracking and task completion
- Designed responsive and user-friendly interface for better user experience

Eco Hub Web System 2024-CURRENT
Technologies: PHP, MySQL, JavaScript, HTML/CSS
GitHub: https://github.com/alousius116/eco-hub-web-system

- Developed a full-stack web application with authentication and session management
- Implemented wishlist and borrowing modules
- Created responsive frontend pages using JavaScript and CSS
- Managed backend database operations and user data handling
- Improved understanding of frontend-backend integration and database design

BTC Tuition System 2024-CURRENT
Technologies: Python
GitHub: https://github.com/alousius116/btc-tuition-system

- Developed a Python-based tuition management system for handling tuition-related operations
- Implemented student and record management functionalities
- Organized data handling and system flow using Python programming logic
- Improved understanding of application structure and problem-solving techniques

Exploratory Data Analysis (EDA) Assignment 2024-CURRENT
Technologies: Python, Pandas, Excel

- Performed exploratory data analysis using Python and Pandas
- Cleaned and analyzed datasets to identify trends and patterns
- Visualized and interpreted data for reporting purposes
